

Oppose Hewlett Packard's un-American acts

HP is forcing its U.S. employees to train Indian replacements. Even though Roseville headcount has dropped from 6500 to 4000 -- and they have run no help wanted in the Sacramento Bee for years -- they claim that this area lacks sufficient talent and are bringing engineers in from Singapore - to be trained by Americans.

HP now has over 10,000 workers in India, many engaged in advanced R&D that threatens to undermine our U.S. economic leadership. Carly opposes paying a fair American wage, but has leased herself a \$30,000,000 Gulfstream jet.

Carly recently stated to Congress that "There is no job that is America's God-given right anymore." This is not the company that Bill Hewlett and Dave Packard envisioned. This is corporate greed gone mad.
